

SURFACE CHEMISTRY.

- (i) Differentiate Lyophilic and lyophobic colloid?
- (ii) What are micelles and how they are formed? What is CMC?
- (iii) Explain peptisation and its cause. With e.g.
- (iv) what is dialysis ? Give applications
- (v) Why do sols show Brownian movement and Tyndal effect
- (vi) What is gold no? What does it show?
- (vii) What are emulsions and emulsifying agents?
- (viii) What are applications of Colloids?
